ISTQB FOUNDATION (ISTQB) COURSE

This 3 days course is aimed at individuals involved in software testing and prepares them to write the ISTQB Foundation Level Exam. The syllabus of the course is designed according to the latest published ISTQB Foundation Level Syllabus. After completion of the course, candidates can continue to self-study until when he/she is ready to write the exam by registering via SASTQB (South African Software Testing Qualifications Board). This ensures the candidates are given enough individual preparation time before writing the exam.

COURSE OBJECTIVES:

The learning objectives for this course include an understanding of:

- Module 1: Fundamentals of Testing
- Module 2: Testing Throughout the Life Cycle
- Module 3: Static Techniques
- Module 4: Test Design Techniques
- Module 5: Test Management
- Module 6: Tool Support for Testing

COURSE / STUDENT MATERIALS:

- 3 days of instructor-led training and exercise facilitation
- Learner Manual (excellent post-class reference)
- Participation in unique exercises designed to apply concepts
- Sample exam papers with answers

CERTIFICATION:

Successful completion of the course will lead to ISTQB Foundation Training Attendance Certificate. After completion of the course, candidates can write the exam by registering via SASTQB (South African Software Testing Qualifications Board), Prometric or other accredited examination organisations who can provide ISTQB Foundation exams.

PREREQUISITES:

- MyTest Fundamentals (TST101) Course completion is recommended
- Familiarity with IT software development

AUDIENCE:

- Anyone involved in software testing, testers, developers, business analysts and managers
